

# The Yearly CHI CHI Cycle

In addition to the Daily moods, the EARTHSOING calendar shows the Chi Chi circuits. There are 24 Chi Chi vibrations lasting about 15 days. The sounds produced by these frequencies are those of the Alphabet and they vibrate the 24 organs in that same order. Two organs have 2 sounds, which explains why there are 26 letters in the alphabet. The Chi Chi are concurrent with the Sun passing through the 12 starsigns of the Zodiac and there are 2 per starsign. There are 365.25 days in a year. Some Chi Chi last for 16 days, and some for 14 days. The 2008-2009 cycle, which started at exactly 0000 hrs on the 21st of June has 13 Chi Chi of 15 days, 8 of 16 days and 3 of 14 days duration. Each Chi Chi frequency connects with a space in 4 left eye circuits. The circuits are activated 6 times per day coinciding with the Daily moods.

The above picture of the Chi Chi ring, shows the points in the body for each Chi Chi mood. The Unison points are the same as those for the eyes. The Unison  $\oplus$  and the Hara  $\blacksquare$  spaces are both part of the organ's Chi Chi circuit with the Hara points on the arms. The Mind  $\blacktriangle$  and the Heart  $\bullet$  circles are also in alphabetical order, but the Mind circle has moved 4 Chi Chi anticlockwise and the Heart circle has rotated 10 Chi Chi anti-clockwise. The matrix of the 4 left eye bioelectrical circuits which generates the Cerebellum Chi Chi circuit is shown in the centre of the above picture as an example. The location of the spaces in the left eye are shown next to that. The matrices for each Chi Chi circuit are shown in the **TIBETAN ALPHABET** on this web site.
