C. BRAIN Magenta/Identity

The Brain brings the signals from your nervous system to you. This takes one third of a second. You can see one hundredth of a second. This means that everything you see, smell, hear, taste, touch, think, feel, and emote is way in the past to the "I" that is "here now". Thirty three and a third times your capacity to see it ago! The Brain represents Science it gives us the ability to obtain and isolate the laws that govern our life. The Brain is electrostatically charged and it pulses at twice the rate of the Heart. It has no feeling and does not understand "enough". The Brain is always on a mission. In the negative it produces psychosis and polarises everything right/wrong, good/bad, like/dislike. Because there is no feeling it only knows fear.

Positive and negative states are: Identity/Psychosis, Growth/Academic Underachievement, Command/The Cult, Adult-Mature/Psychopathic Syndrome.

The Brain is the Realized Fool in the major arcana and the knights in the Tarot represent the illusions in the left eye. Creatures of the Brain are the Fox, Parrot and Beaver. The points on the body are the middle of the hairline, clavicle joint, top inside scapula and the coccyx. In the left eye the Brain checks with the Hara and the Throat.

The points vibrated during the Chi Chi of the Brain are: C- Mid hairline and vertebra C1, G- Right jaw, MN- Sternum, C-Coccyx.

During the Brain Chi Chi eat apples and see that you are not doing the thinking. It just happens and depends a lot on which organ is being vibrated by the Pulse. The Mind operates because it does not know. It has knowledge because it does not understand. I found it liberating when I started to see that there are only thoughts of "I" . Any fear that comes up now, I go to its centre to find there is no one there, just "Awareness". The only thing that is real in the whole of existence.
