DISTILLATION

E I P E

E. TONGUE Yellow/Truth

The tongue is what we speak the truth with. The nose (mind-point) we stick in to find out the truth. Truth is only Here Now and we are that. The negative in the tongue is Desire. Wanting to change the past or going into the future. So you move, and desire helps to do that. This makes the circuit play a major roll in your consciousness. The signal enters the 10th thoracic vertebra (8th from sacrum) and the bioelectricity connects the 7 vertebras below it. Each one of these vertebras are attached to one of our 7 bodies. These bodies are: 1) Physical/skin, 2) Subcutaneous layer, 3) Musculature, 4) Veins and Arteries, 5) Organs, 6) Nerves, 7) The Electricity. The Tongue completes the 1st octave and E is the most used sound in the alphabet.

The points on the body are the centre of the skull, the tip of the nose, above the navel, and the left libia. Not speaking our truth charges up the tongue circuit and makes movement less fluid; a condition called paresis.

The right eye positive and negative states are: Truth/Desire, Trend/Paresis, Model-Example/Pathological Liar, Style/Fetishism.

In the left eye, the female checks with the gall bladder (Freedom) and the legs (Activity). The tarot cards are the fours. The tongue in the major arcana is the Heirophant/ Nothingness.

The anteater is a form of the tongue in the animal world.

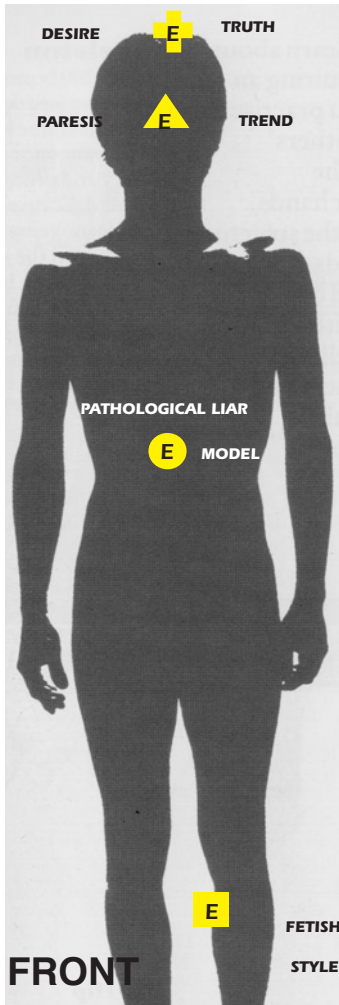

In the Chi Chi the shockpoints are felt in the following points on the body: E-centre of skull and vertebra T10, I-Between eyebrows, P- Left Breast, E- L. inside forearm.

During the time of the tongue stay in truth. If your tongue is still, the mind goes quiet. Try Osho's meditation from the Bagan. Put your attention on the centre of the tongue and allow the sound of the inward breath to fall into the heart.
