### F. ARMS Dark Pink/Balance

The femininity in the Arms helps us to balance and they open up the heart to the future. They give us the capacity (upper arm), the charisma (elbows) and the means (lower arms) to deal with what is ahead. In the negative they give us phobia. These fears which are in the future produce self destructiveness and self defeat.

Positive and Negative states in the right eye are: Balance-Coordination/Phobia, Meaning/Acrophobia, Appeal/Agoraphobia, Custody/Claustrophobia.

In the left eye the Arms check twice with the Heart. The points on the body are Left side of Skull, behind the right ear, right rear shoulder, right hip. The vertebra is the second from the top of the spine which happens to be the first one you can touch. The monkey is an Arms creature.

The Arms are represented by the High Priestess/Inner Voice in the Tarot. The cards in the Left eye are the Queens who uphold things for the Kings.

Shockpoints are in: F- Right side back of skull and vertebra C2, J- Middle of eyebrows, Q- Below breasts, F- Right rear shoulder.

During the Arms if there is a fear or tendency to self destruct look who is at the centre of it. You will find nothing/no-one and the fear evaporates. You; will always be "here now" and the future is not yet,
