COMMUNAL RELATIONS

H L S H

H. BLADDER Blueblack/Control

The Bladder is our awareness of the other which is very important to Librans because they find themselves through relating. It is the waterworks, which in the negative produces stress and hatred of others. In the positive it gives us control, observation attraction and protocol, and the negative qualities are stress, enuresis, hypochondria and explosive personality.

When the circuit is clear it can read minds. If it functions well it produces composure but the opposite is that you become a snob to protect yourself in public. Most people have charges in this circuit. Enuresis which is a fear of being humiliated by someone is the most common. The charge comes from having wet one's pants or the bed during childhood. When a person is perceived to get off on humiliating you, you will try to be nicer than you are.

The points on the body in the right eye are the right forehead, the right under clavicle and the right crotch. In the left eye the bladder checks with the duodenum and the pons. The tarot cards in the left eye are the eights and the major arcana card is Strength/Courage.

Creatures of the bladder are the owl and spiders. Diseases are Epstein Barr, chronic fatigue and hairloss.

The points that come up during the Bladder Chi Chi in the last half of Libra are: H- R.back skull and vertebra T4, L- Chin, S- Top Right shoulder blade, H- Right armpit.

During the Bladder Chi Chi become aware that you have no control over anything. You are aware of what has happened. This way you will not stress out and you can flow like water.
