J. SPINAL BASE Red/Trust

The Spinal Base is our separation from others; our privacy. We only show this organ to our lover and only in very special circumstances. It is about being "at ease" and the opposite is paranoia; someone is after our arse. Its function is elimination and sexuality and if the electrical circuit is clear there is no separation from other human beings because there is nothing to hide.

In the positive it is trust, propriety, sensation and fashion. In the negative it creates paranoia (holding on to something we wish was not there), senile dementia (reality floats through then and now), paranoid personality (someone is going to figure out what we are up to) and erotomania (fear of spinal tremors). Some of these negative conditions result from having been spanked.

The organ checks with the Lungs and the Pancreas in the left eye. Paranoia causes us to have questions and to figure out the answers we smoke cigarettes because it raises the IQ. Genius is in this circuit.

The tarot card for the spinal base is Judgement/Beyond Illusion and in the left eye the threes come up. The three of cups which is in the mind part of the circuit is about figuring out one of our biggest illusions. This is that monogamy is the correct way, but we find it never works because we get stuck on the idea that we are giving and getting love from the other. So we see what it is like to have a threesome and if both people love us and we stay in truth we find that there is just as much love. So we realise that we are love we cannot give it or get it; all we can do is shine it.

The points on the body are the eye brows, upper breasts, and above the knees. The creature is the cat; it can look perfectly at ease in the most negative places. A country is Greece and most people from Israel have problems in this circuit.

The points on the body in the Chi Chi of the second half of Scorpio are:
I- middle back of skull and vertebra T2, O- upper lip, U- Right top of clavicle,
J- Above elbows.

During the Spinal Base Chi Chi (7 Nov.-21`Nov.) Relax your arsehole; without this the rest of your body is in tension.
