## K. DUODENUM light green Tranquillity

This is the Buddha circuit, a gate to the Divine. The organ is a pipe, twelve fingers long which takes the food from the stomach to the small intestine. It coats the food with sugars from the pancreas so that even if it is Macdonald's, your small intestine will still try to digest it. It cleans out coffee and marijuana. Coffee makes you more speedy; marijuana slows you down.

It has to do with money and respect. Which means that it is the most spiritual and the most materialistic organ. The opposite is worry, especially about not having enough money. If it malfunctions you suffer from acid stomach or heartburn and then the circuit is anti-spiritual.

The positive gives tranquillity, convention, respectability and value judgement. While the negative is anxiety, hostility of resentment (Can't seem to do anything right), anxiety neurosis (our opinions, associates and interests are the most important things in our life) and disrepute (doing what we're "not supposed to do").

The left eye circuit checks with the tongue (tip of the nose) and the testes ovaries and the cards are the twos. The two of pentacles the card of the psychic is in this organ. He is the juggler who wonders what is real because sometimes his gift works at other times it doesn't. Psychics really stress this organ. The major arcana card for the Duodenum is Justice/Breakthrough.

Creatures are cows; they have four of these pipes and legend in India is you can get enlightened looking in their eyes. If the circuit is clear mosquitos leave you alone. The points on the body are the left jaw, the left lower scapula and the left sitbone.

The points in the body which vibrate during the Chi Chi of the Duodenum in the first half of Sagittarius are: K-bottom left back of skull and vertebra C5, P- Left look, V- Right lower rib, K- Left lower scapula.

During the Duodenum Chi Chi remember that money was invented by humans and it is only there to make things happen it will never make you happy.
