○ SMALL INTESTINE Pink Affection

The small intestine digests the food we eat and through it we feel the world. It is very sweet because the food gets coated with sugars before it enters this long crinkly winding tube. It is all about mother and how we express affection. We learn how to repress from our mother and she also shows us how we can manipulate with affection. If you are not sweet you won't get my affection or "you just hurt me so I am not going to talk to you for a while; suck on that". Repression eventually starts to give you lower back problems because the electricity is no longer flowing freely through the bottom vertebra in your spine.

In the right eye the positive states are affection, membership, surrender and preservation. The negative states are repression (fear of being taken over by our emotions), symbiotic psychosis/clinging (clinging to objects or persons so that we will get the affection we need), passive-dependant (our emotions are reflected off someone else) and passive aggression (we hate anyone who tries to love us).

The Tarot card is The World and the Osho Zen card is Completion. In the Left Eye the cards are the Pages and the circuit checks with the Cerebellum twice.

The points on the body in the male are middle behind front skull, upper lip, the navel and inside right ankle. In the female the back of the skull and between the shoulder blades are in the circuit.

A creature is the pig and it checks with the dolphin in the cerebellum. Byron Bay and environs vibrate the small intestine. We watch movies in the Piggery and there are several colonies of dolphins off the coast. We are into hugging and working on mother issues and a common sight in Byron are navels, often on a gorgeous pregnant belly.

A country is Greenland where Eskimos live.

The Chi Chi points on the body are: O-Middle forward on skull and vertebra L5, S- Right cheek, Yz- Mid inside scapulars, O- Inside right wrist.

During the small intestine Chi Chi remember it is the organ through which you feel the world. Give as much affection as you possibly can and replenish your small intestine with acidophilus.
