THE PERSONALITY

U Yz F U

U KIDNEYS Light blue/Clarity

The kidneys give us clarity by cleaning toxins out of the blood. They are feminine and we have two in case one of them fails since they cannot regenerate. When they malfunction it effects our receptivity and we start to project because we only have our own perception. They provide the "Chi" in our bodies.

The positive states of consciousness are: clarity, meditation, superior perception and authorization. In the negative the states are; projection (putting our ideas upon reality), depersonalization (fear of losing one's identity), sexual orientation disturbances (altering the polarity of the genitals for sexual preference) and psychotic epilepsy or disorders of thinking (we sound stupid to ourselves when heard by others).

The Tarot card is The Chariot, Awareness in the Osho Zen Deck. The cards in the left eye are the nines and this circuit checks with the testes/ovaries and the bladder. The most common card, both in men and women, results from injuries of the chin. It is the nine of pentacles, the lady in the garden. It consists of a piss off with females who are wonderful as long as you do what they want but who strike if you do something they disapprove of.

Points on the body are: mid forehead, right top clavicle, right femur for the right eye and the chin and right armpit are in the left eye circuit.

Countries are Germany and China and an institution is the Catholic Church. Homosexuality has to do with the kidneys and a disease is Aids.

During the chi chi the points being tuned are: U- back centre of skull and vertebra T5, Yz- Lower back of skull, F- Right rear shoulder, U- R. shoulder joint.

Be as receptive as you can be during this chi chi.

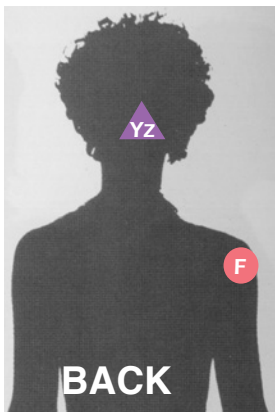

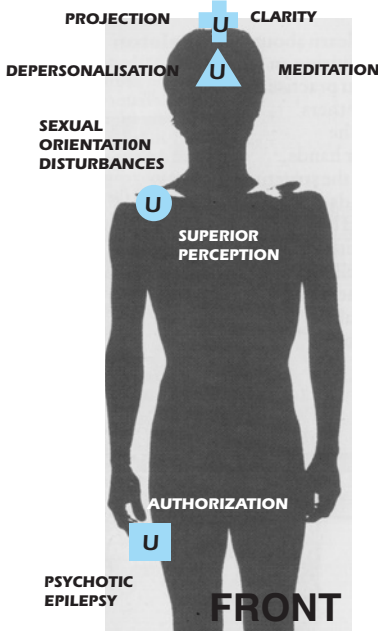

Give your kidneys a daily TIBETAN KIDNEY SHOWER. Hold both hands above the knees while you bend over under the shower with the cold water splashing the middle of the back. Breath out and then flap your abdomen. Breath in, then breath out. Flap the stomach again. Repeat at your own pleasure.
