W PONS Royal Purple/Centredness

This is a small prune-sized organ at the top of the spine. The Pons gives centering in the top of the body. It is the bridge between the two halves of the brain. Its sister is the colon which takes care of centering in the lower body.

The Pons contains all our memories and gives us orgasm when we make love with someone else. When we create the energy with someone else, the Pons receives sufficient electricity to arc at the moment of orgasm. We get a window into enlightenment. This is why we love to do it so much. We use the Pons to go in and out of the body and it connects with our centre the hara. Whirling is possible if this organ is clear. Rumi became enlightened after whirling continually for three days.

In the positive states of consciousness it gives us centredness, grace, ascension and improvisation and is therefore very spiritual. The negative states are Crisis (fear of being wounded), Amnesia (forgetting what we would do, wondering what we could do), Transient Global Amnesia (On top of a world which is a bubble we constructed out of circumstance), and Confabulation (memories are out of order because we insert them into a new context).

The Tarot card is the Wheel of Fortune and the Osho Zen card is Change. In the Left Eye the cards are the twos and the circuit checks with the Colon and the Lungs. The most common card is the two of cups; the idea that there is only one soulmate. It often results from sexual abuse at an early age. The truth is that there are many. They come when we need them not when we want them. The signal that there is a soulmate is when you get sexually attracted.

The points on the body in the male are: right look, right breast, right knee. In the female, the left look and the forearms are in the circuit. Creatures are the Whale, the Elephant and the Peacock. Countries are Denmark and India. Indian people have a wonderful technique to get in touch with their memories by shaking their head.

The Chi Chi tunes the circuit in the points: W-Right back of skull and vertebra T8, B- Right Chin, H- Right under clavicle, W- Right elbow.

During the Chi Chi of the Pons try whirling for a bit every day. Play Bach and Michael Jackson for music. No Dimensions is the meditation during this Chi Chi!. WOW is the sound to connect with this organ. When it opens, there is enlightenment because we are one! Not two.
