INSTINCTIVE MIND

X C I X

X LEGS Violet/Action

The Legs are action and they connect us with the past. The upper parts give us the capacity, the knees are our charisma, the lower legs are the means and the foot and toes are the doing. They allow us meditation in action and in the negative they hate being receptive or still.

The positive gives us activity, perspective, compensation and survival. The negative states are: Schizophrenia (unable to function in logical sequences), Handicapped (unable to go anywhere without someone else determining your every step), Competition (exertion just to beat someone) and Fugue State (going with no particular destination just to get away from the past).

The horse is the creature of the legs and Korea is a country that vibrates them.

In the female left eye the moods are the aces in the Tarot. The most frequent illusion in the legs is the ace of pentacles, which has to do with the throat and what is real. The mystical definition of what is real is: anything that changes is NOT REAL. The legs check with the throat and the colon. The major arcana card is The Tower/Thunderbolt.

The points are the left ear, left rear shoulder and the left hip. And in the left eye the left nose and the left elbow are in the circuit.

The Chi Chi points in the body are: X- Left side skull and vertebra C4, C- Clavicle joint, I- Left under clavicle, X- Back of left shoulder joint.

During the first part of Gemini remain as much as you can internally silent while in the midst of external activity.
