Yz CEREBELLUM Purple/Orientation

The back part of the brain gives us our dreams. It releases the tensions of the day that the brain has created, while it took care of the orientation. The Cerebellum does this by entertaining us during the night. It provides us with pictures which release the wish to be that gorgeous woman or that handsome man. Because we are the realized magician and can be what we are in our dreams.

It allows us during the day to orient the spine to know why (Y) and during the night to say who cares and sleep (Z). In the negative it produces Hysteria because the picture in the mind is different to the one in reality. That makes us freak out. It loves abundance and is the source of telepathy, clairvoyance, and clairaudience. It gives us orgasm during masturbation and the creature is the dolphin.

States of consciousness in the positive are Orientation, Syntony (comprehension of the game), Intrepid (knowing you will get what you need if you deserve it), I.Q. (knowing what is best). The negative states are: Hysteria (The image on the screen contradicts the camera of the eyes), Conversion Hysteria (mentally handicapped by needing sexual orgasm), Histrionic personality (the screen is directing the camera), Dissociative Hysteria (when reality changes, to suck away experience, leaving us like helpless children, innocent and filthy).

The Tarot card is the Realised Magician and the Osho Zen Tarot card is The Master. In the left eye the cards are the Kings. The most common issue is the King of Pentacles (Abundance). The brain telling you that you could have done better. Which is true if you had worked harder and been in control of what was happening.

The points on the body in the male are: crown of skull, mid rear skull, mid inside scapulas and the rear pelvic joints. In the female, the clavicle joint and the right rear shoulder come into the circuit. A creature is the Dolphin. A country is Turkey. A profession is prostitution. A movie is Star Wars. It is the ending of the alphabet, sounded by the last two letters YZ. It is the end of the Sun's journey through the Zodiac as our mother the Earth revolves around him.

The Chi Chi tunes the following points: Yz- Middle top back of skull and vertebra C3,

D-Left side of nose, J- Upper breasts, Yz- Rear pelvic joints.

During the Chi Chi sleep and dream as much as you are able to. Be entertained or entertain. Hang out with dolphins, dance and enjoy the magic of your consciousness.
