Text summarising details

The tongue is what we speak the truth with. The nose (mind-point) we stick in to find out the truth. Truth is only Here Now and we are that. The negative in the tongue is Desire. Wanting to change the past or going into the future. So you move, and desire helps to do that. This makes the circuit play a major roll in your consciousness. The signal enters the 10th thoracic vertebra (8th from sacrum) and the bioelectricity connects the 7 vertebra below it. Each one of these vertebrae are attached to one of our 7 bodies.
